

College of Natural Sciences
Department of Kinesiology

Dear Interested Fitness Assessment Internship Student,

Our Fitness Assessment Program at California State University, San Bernardino is located in HP 121 laboratory. As a student you are required to complete at least 5 hours a week of fitness assessments over the 10-week quarter to fulfill your requirement for KINE 493 course. To be enrolled into KINE 493, you must have senior standing and to be considered for this internship you must have taken at least KINE 481.

Throughout the quarter you would refine your testing skills and test over 80 individuals, which include: heart rate, blood pressure, skin folds, flexibility, grip strength, push-up test, and sub-VO₂ max bike test. During the 10-week period you will become more comfortable and skilled at administering fitness assessments, communicating information effectively, and understanding the importance of cardiovascular risk factors.

If you are interested in this internship, please see the attached application and fill it out and submit to Dr. Dabbs. Please feel free to ask any questions and we look forward to your application.

Sincerely,

Nicole C. Dabbs, PhD

Assistant Professor
Co-Director of Fitness Assessment Program
Department of Kinesiology
California State University – San Bernardino
5500 University Parkway, HP 210
San Bernardino, CA 92407
